

TAKING CONTROL OF AIRCRAFT MAINTENANCE MANAGEMENT

Avdex can improve ongoing Aircraft Maintenance Management by assisting PRA and Owners with the **capture of maintenance and the forecasting of future requirements.**

Avdex will:

-  Capture maintenance directly from the AMO work pack into AMP and link the CRMA to the compliance.
-  Liaise with the Owner or PRA regarding compliance and outstanding tasks.
-  Assist in the capture of ongoing aircraft usage.
-  Generate a monthly (or more often if required) forecasts of upcoming maintenance and full status reports.
-  Generate a full list of required tasks for the AMO to comply with.
-  Notify Owner or PRA of new AD's or SB's and changes to the Factory requirements.

Should you require any further information please feel free to contact Avdex at:
