

ADDING A QUOTATION FUNCTION TO THE AMS SYSTEM

The purpose is to prepare a quotation in the same format as the AMS Work Pack. This allows customers to clearly match the quotation with the final AMS documentation. Quotation Tasks may be created manually, imported from templates, or imported from AMP scheduled maintenance.

AMS Quote offers a variety of helpful features:

Improve productivity

Obtain prior client approval for work packs

Create RFQ for parts & service orders

Create requisition for parts

Estimate required labour
